

Dear MULTIPLEX fans,  
The Modellbau Wels model fair is already over, and we're now preparing for the Intermodellbau / EXPEITEC event in Dortmund. Here you can read what else is new from MULTIPLEX Modellsport.

## Leap into Spring with MULTIPLEX

---

### 100% legible even in bright sunlight

A place in the sun - with your COCKPIT SX. The integral screen is always clearly legible thanks to the automatic day / night switching. In fact, switching off the backlighting in sunlight saves so much battery capacity that the transmitter is capable of operating for up to 24 hours. This means that you can devote the whole day to what you really want to do - i.e. fly your models - without worrying, and, in particular, without the need for a battery charger.

## COCKPIT SX 7 / 9 in team colours

Bright, fresh colours for Springtime! In addition to 'action yellow', a decal is now available for the COCKPIT SX 7 / 9 in genuine MULTIPLEX orange. A must-have for all true MULTIPLEX fans!

**COCKPIT SX 7 / 9 decal sheet**

**# 72 4405**

**11.90 €\***

Set contents: 1 x COCKPIT SX 7 decal, orange; 1 x COCKPIT SX 9 decal, orange

## Rendezvous with MULTIPLEX / HiTEC

---

### Intermodellbau & EXPERTEC Dortmund

By next week things will already be well under way at Dortmund! From Friday to Sunday (22 - 24.4.16) we will be in attendance at the EXPERTEC Fair with our main stand. Our staff - including team pilots Bernd Beschorner and Manfred Greve - will be on hand to provide expert advice on the high-quality M-LINK transmission system and radio control equipment. We will also be displaying our ELAPOR models at the Intermodellbau fair from Wednesday to Sunday (20 - 24.4.16). We look forward to meeting you!

## Magazine reviews

---

### COCKPIT SX 7 / 9

*"NEW GENERATION - Multiplex has introduced the third generation of the Cockpit family to the marketplace, and has already gained great attention with the system's integral full-colour touch-screen, elegant layout, standard speech output and telemetry capability. There is much that's new, but proven features have been retained. What the Cockpit SX 7 / 9 can do, how easy it is to program, and the target modeller for this mid-range radio control system - that's what we were keen to find out ... Multiplex has garnered fulsome praise for the transmitter's full-colour touch-screen, integral telemetry function and speech output. The Cockpit SX software boasts a wide range of functions which really deserve a full explanation in a comprehensive manual. In everyday use the outstanding features of this medium-priced radio control system are its excellent functionality, very good ergonomics and visually impressive design. When you hold the transmitter for the first time, you just don't want to put it down again - and that's no problem either, since it can operate for almost 24 hours between charges."*

### COCKPIT SX 7 / 9

*"The exceptional features of the COCKPIT SX are its elevated quality and functionality: it can do anything anyone could wish for - even if you fly quite demanding models. The external design of the system is great, and can even be fine-tuned with the optional coloured decals to suit individual wishes. The system is impressively easy to operate, and "touch and fly" is not just a motto here: it really works! Adjusting the settings is an intuitive matter, and the superb touch-screen is fantastic in terms of contrast and responsiveness. All in all the new COCKPIT SX earns an unqualified recommendation from us, and the icing on the cake is that it is 100 percent "Made in Germany!"*

**FlugModell 5/2016**

### COCKPIT SX 7 / 9

*"I would recommend these radio control systems to anyone - whether beginner or advanced pilot, power flyer or aerobatic fan, glider or multi-copter pilot. For its price the COCKPIT SX 7 / 9 is a great deal."*

**RC Revue 4/2016**

### **FUNCUB XL**

*"A super fun-model which caters for an endless range of possible applications. It is produced to a level of quality which is superior by any standards."*

**Aerotec 4/2016**

### **ROCKSTAR**

*"The Rockstar is a true star, without any affectations. MULTIPLEX has managed a faultless combination of components which ensure any amount of flying fun. At least in my case, it's the pilot that is the sole limiting factor. The model's appearance in the air is simply brilliant, as are its flying qualities. There is always ample power on tap."*

**Conrad Club Magazin actuell 01/2016**

### **WINGSTABI 7 / 9**

*"I copied the scene in the promotional video - and it really does work!" "At the end of our comprehensive test, one thing was clear: the pilot still has to be able to fly, but the WINGSTABI is a tremendous help. And flying with the WINGSTABI is simply more fun than without. For years now the gyro has been an integral part of the model helicopter scene, so why not also in our fixed-wing models? You can set up the unit to provide as much or as little support as you wish when flying, and in this way gradually improve your own piloting skills. Think of the WINGSTABI as your little background helper. Whether you use a SMART SX or a PROFI TX, the range of applications is almost limitless, and the system even works without problem with different makes of radio. Our assessment: recommended, with a great fun factor!"*

**FlugModell 5/2016**

### **HiTEC X2 700**

*"With the MULTIcharger X2 700 HiTEC has introduced a genuine all-rounder, and at an absolutely affordable price, too." "The HiTEC MULTIcharger X2 700 gives you the same feeling of quality as a Porsche, and constitutes an extremely high-performance battery charger which is successful in every regard. Even the more sophisticated modeller will rarely, if ever, find the charger's limits, as there is always plenty of power available. Of course, there is no question that you have to know what you're doing when there's so much power under the bonnet, but the charger is great fun to use, and that's what we modellers really want."*
