

Dear MULTIPLEX-Fans,

We welcome the Summer of 2016 with a number of new items, including products which are aimed at keen football fans as well as modellers. To mark the starting whistle of the Euro Football Championships we are introducing a special series of the FOX chuck-glider in a range of national colours.

New MULTIPLEX products available in model shops right now!

Special Edition: the Euro 2016 Fox!

The 2016 UEFA Euro Championships start on 10 June 2016 with host nation France contesting the opening game in the Stade de France in St.-Denis. To mark the occasion the MULTIPLEX "FOX" chuck glider is now available in a range of national colours.

FOX black/red/yellow EM 2016	# 21 4258	10.90 €* each
FOX blue/white/red EM 2016	# 21 4291	10.90 €* each
FOX red/white	# 21 4289	10.90 €* each

Decal sheet PROFI TX carbon black

Superior carbon look for the MULTIPLEX PROFI TX

New item now available: carbon-look decal for the PROFI TX high-end tray transmitter, with realistic surface texture. The decal is made of the proven film already available as an option for the COCKPIT SX 7 / 9. The transfer film supplied in the set makes application easy.

COCKPIT SX 9 decal sheet green

New decal sheet to customize the MULTIPLEX COCKPIT SX

True to the motto "Your COCKPIT SX, your style", MULTIPLEX now offers another decal sheet for the COCKPIT SX 9 transmitter. Besides deceptively real looking carbon style, action-edition in yellow and MULTIPLEX team-colour orange, there's this new one in neon green: Flourescent digital camouflage . Warning, extremely toxic!

ROXXY® EVO LiPO 3-2200 20C with BID-Chip (M6)

ROXXY® battery now available with M6 connector

Polarised, versatile, compact – thanks to the gold-contact M6 connector. Suitable for currents up to 35 A (60 A for 30 sec). The pack is fitted with a BID chip as standard. This enables a POWER PEAK BID charger to detect the battery automatically, guaranteeing safe, simple charging. The ROXXY® EVO LiPO 3-2200 20C fits in the following MULTIPLEX models: EasyStar II, EasyGlider PRO, Solius, Heron.

ROXXY® EVO LiPO 3-2200 20C +BID-Chip (M6)

MULTIPLEX wins VTH reader's choice

MULTIPLEX gains 'Eagle' awards from FMT (Flug-Modell und Technik magazine) for: Rockstar and FunCub XL

The prize award ceremony for the VTH readers' choice was held in the German city of Baden-Baden in brilliant sunshine. The modelling awards for 2016 coincided with the seventieth anniversary of VTH (Verlag für Technik und Handwerk neue Medien GmbH - German modelling publisher) spearheaded by the new Chief Executive Officer, Julia-Sophia Ernst-Hausmann, forming a great background to the occasion. VTH took the opportunity to honour MULTIPLEX as one of its oldest and most faithful advertisers!

We are particularly proud of the five awards we gained, as voted by the readers of FMT:

1st place, Foamie category: [Rockstar](#)

1st place, New Products category: [FunCub XL](#)

2nd place, Electric glider category: [Heron](#)

2nd place, RC Electronics category: [COCKPIT SX 7 / 9](#)

3rd place, RC Electronics category: [PROFI TX](#)

We would like to say 'thankyou' to the readers of FMT magazine, and to the magazine contributors for their excellent reviews. We wish the publisher VTH all the best on its seventieth anniversary!

Magazine reviews

FUNCUB XL

"Making good things better is a fine art, but again and again MULTIPLEX has

demonstrated that its team has mastered this challenge. (...) Although significantly larger and heavier, the FunCub XL really does justify its appellation, and the company can be proud of this. The aeroplane is simply great fun to fly, and forms the ideal everyday model, especially in Winter, when you are keen to get into the air even if conditions are less than perfect. With the landing flaps - a standard feature - and the options of tow-release, load bay, floats and lighting system it is an easy matter to enhance this MULTIPLEX model's versatility, so there is never any danger of boredom creeping in. We simply cannot think of any other aeroplane which offers so many options and such a broad spectrum for laid-back fun at the strip. Once again MULTIPLEX has a great hit on its hands with the FunCub XL."

Modell Aviator 6/2016

FUNCUB XL

"The FunCub XL really is highly entertaining: stable flying characteristics, wide speed range, good manoeuvrability and plenty of power form the perfect combination for unadulterated flying fun. In its basic form the aircraft is great to fly, but the additional options make it even more attractive - for advanced pilot and expert alike. Whether you go for a scale lighting system for great effects at dusk, a servo-operated load bay to impress the spectators at open flying days, a set of floats for the lake-side or a tow-release for pulling up gliders at a flat-field soaring site, there is something on offer for everyone. All this takes for granted the typical MULTIPLEX quality and fully mature design and construction. The FunCub XL from MULTIPLEX turns out to be an excellent overall design which satisfies many needs, and we consider it an absolute knock-out of a model, just like the small FunCub six years previously."

RC-F 05/2016

FUNCUB XL

"By now, with the conclusion of the second part of this review, I can finally claim to have tried out all the options offered by the FUNCUB XL, and I am able to confirm what I predicted in the first part: you can in fact fly the FunCub XL anywhere, in any weather conditions, and from any type of terrain. The power system configured by MULTIPLEX is simply a perfect match to the airframe. Even on water the giant FunCub cuts a very fine figure. The only problem is yours: how will you equip your FunCub XL? the options are virtually limitless!"

RC Pilot 6/2016

FUNGLIDER

"What impressed us was the high manufacturing quality, the clear evidence of mature design, the high level of pre-fabrication, the model's superior flying qualities, its versatility and perfectly matched power system. The aeroplane is swift to rig at the field without the need for tools - the wings and tailplane just click into place - and the operating instructions are comprehensive and written in clear, unambiguous language."

MRA 6/2016

COCKPIT SX 7 / 9

"The transmitter ergonomics are perfect: all the controls can be reached with the fingertips, and we especially appreciated the position of the two rollers on the back of the transmitter case. The touch-screen is intuitive in operation. (...) The COCKPIT SX 7 / 9 is suitable for all kinds of model aircraft, while the transmitter's compact format makes it an especially good choice for use with

professional multi- rotor copters."

Aerotec 6/2016

COCKPIT SX 7 / 9

"The third generation of the COCKPIT SX once again represents a new milestone for MULTIPLEX. Quality, ease of handling, long operating times and above all the colour touch-screen - which really can be read in sunlight - are genuine arguments in favour of the set. It forms an excellent main transmitter, but the COCKPIT SX 9 also makes a superb lightweight second or hand-held transmitter for glider guiders of all kinds. The slogan "touch and fly" says it all, and there's no need to add a word."

PROP 1/2016

POWER PEAK D7

"The Power Peak D7 is an excellent all-purpose battery charger. It combines impressive power, ultra-precise operation and very robust construction. The LCD screen makes the unit simple to control. Since the two outputs are of equal power, it is possible to charge two fully discharged 6S 7500 mAh LiPo batteries simultaneously in less than ninety minutes."

RC Pilot 6/2016

POWER PEAK D7

"In the Power Peak D7 MULTIPLEX has produced an absolutely top-quality battery charger which is also ultra-simple to operate. The programming principles become clear after just a few minutes of practice, and the menu system is intuitive and easy to navigate. (...) The presence of two independent 200 Watt charge outputs is almost unprecedented. This is undoubtedly a superior charger whose numerous facilities and options make it a worthwhile investment."

MRA 6/2016

POWER PEAK D7

"MULTIPLEX has developed an outstanding all-purpose battery charger with the Power Peak D7 EQ-BID. The total charge power of 400 Watt - and please note that this is also available when the unit is connected to the 220 Volt mains - is very impressive. It simply means that there is no longer a need to resort to an external mains PSU when using the charger in the home garage or at the camp-site, as is the case with the normal run of 12 Volt chargers. In my opinion this represents a genuine safety enhancement. At the same time the extremely quiet cooling fans make it possible to use the charger in the home workshop without having to endure noise torture."

MFI 7/2016

Great success for MULTIPLEX / HiTEC team pilots

1st place for Matthias Freitag / ROYAL SX

Matthias Freitag has made a successful start in his first F3K season as a Senior. The idyllically situated flying site of the FMC Walsum club was the location for an early round in the successful D-Tour series.

Matthias had already won this event as a Youth back in the year 2011, and this time he again took the overall crown.

His equipment: MULTIPLEX ROYAL SX, RX-7 M-LINK receiver

Josef Mögn wins 1st TW Bavarian Open Thermal Cup for large-span gliders

The Bavarian Open - a competition for large-span gliders - was held at Weissenburg on 29.05.16, and PROFI TX pilot Josef Mögn took top spot on the podium.

His equipment: Profi TX 16 / RX-12 DR pro receiver; Hitec / MPX servos, Vario / altimeter / current / GPS sensors

Álvaro Silgado wins the F3F International Open

La Muela / Alarilla (Guadalajara, Spain) is one of the world's most famous slope-soaring sites. This year the flying contest was also included in the F3F World Cup, and more than thirty model pilots from all over the globe took part. Thirteen rounds were flown over the three days of the event, and after seven rounds MULTIPLEX team pilot Álvaro Silgado took a clear lead with his PROFITX. He then managed to defend his top position effortlessly right to the end.

MULTIPLEX victories in the International Race at Haarlem

Over the Whitsun weekend the MULTIPLEX RC racing boat team competed in the largest international Friendship Regatta, held at Haarlem, Holland. Their results were outstanding:

- 1st place in FSR-V 15 cc: Zack Humphries
- 2nd place in FSR-V 15 cc: Sebastien Videmont
- 1st place A-Final FSR-V 7.5 cc seniors: Winfried Ott
- 1st place B-Final FSR-V 3.5 cc seniors: Giuliano Ott
- 2nd place A-Final FSR-V 3.5 cc seniors: Markus Schwab
- TQ in FSR-V 3.5 cc: Zack Humphries
- TQ in FSR-V 15 cc: Zack Humphries

"The technology worked extremely well. Many thanks to Multiplex and Hitec for their professional support," said Winfried Ott.

"No problem with the Royal SX transmitter, and no problem with the Hitec waterproof servos," was Sebastien Videmont's comment.

Warmest congratulations! MULTIPLEX M-LINK and HiTEC - systems for winners!

Best wishes
Team MULTIPLEX
